

ROHIT KUMAR P BEGUR

Software Engineer | Full-Stack & Cloud Application Development
Bengaluru, India | rohithkumarpbegur@gmail.com | +91 7975193883 | [LinkedIn](#) | [GitHub](#)

PROFILE SUMMARY

Software Engineer with 1+ year of production experience delivering scalable full-stack applications using Python (FastAPI/Flask), JavaScript, Firebase, Flutter, and PostgreSQL. Sole engineer responsible for architecting, developing, deploying, and maintaining an end-to-end CRM platform and companion mobile application, including secure authentication, 20+ REST APIs, role-based access control, and workflow automation. Comfortable owning projects independently across the full SDLC, from requirements gathering through production deployment and support. Strong interest in backend engineering, cloud infrastructure, AI/ML, and modern DevOps tooling, with a track record of quickly learning new technologies to solve business problems.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, Dart

Backend: FastAPI, Flask, REST APIs, JWT Authentication, Node.js, Microservices

Frontend: Flutter, React (Basics), HTML5, CSS3

Databases (SQL & NoSQL): PostgreSQL, MySQL, Firebase Firestore, Firebase Realtime DB, Redis

Cloud & DevOps: Docker, AWS (EC2, S3), Firebase Hosting, Netlify, CI/CD Basics, Git

AI & Automation: NLP, OCR (Tesseract), Pandas, n8n, OpenAI APIs

Tools & Practices: Git, Linux, Postman, Power BI, Tableau, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Developer (Sole Developer) | Polymetalz Pvt. Ltd.

Aug 2025 – Present

- Architected and built the company's end-to-end CRM platform as the sole software engineer, spanning a web application, Flutter Android app, backend APIs, deployment pipeline, and workflow automation.
- Designed secure phone-OTP authentication, role-based access control, customer-level and section-level permissions, activity tracking, and automated midnight logout to protect sensitive business data.
- Developed and maintained 20+ REST APIs in Python/Flask enabling real-time data synchronization across web, mobile, and internal dashboards.
- Integrated Firebase (Firestore, Realtime Database, Auth) and MySQL/PostgreSQL, using Redis for caching and fast session/state lookups; enforced data security with Firestore rules and server-side role validation.
- Rebuilt the finance module to implement a per-kilogram credit pricing engine with an eight-step calculation workflow, integrated into the existing design system.
- Resolved production authentication and data-migration issues, automated pricing workflows using n8n, and owned the complete software lifecycle from requirements through deployment and support.

INTERNSHIPS

- Data Science Intern — Gyaanova (Mar 2025 – Jun 2025): Performed data cleaning and analysis and built Power BI and Tableau dashboards to support business reporting.
- AWS DevOps Intern — NSDC (Sep 2024 – Nov 2024): Gained hands-on experience with EC2, S3, and CI/CD fundamentals for cloud deployment.
- Full Stack Intern — Grow4Tech (May 2023 – Jun 2023): Built web features using HTML, CSS, JavaScript, Flask, and SQL.

PROJECTS

- FlowStock — Inventory & Order Management System (React, TypeScript, FastAPI, PostgreSQL, Docker): Implemented JWT authentication, RBAC, an inventory ledger, and REST APIs for order and stock tracking.
- AI Resume Extractor & Ranker (Python, Flask, OCR, NLP): Built an automated pipeline to parse, score, and rank resumes against job criteria.
- Course Coordinator's Diary (HTML, CSS, JavaScript, PHP, SQL): Developed an academic management web application for tracking coursework and schedules.

EDUCATION

B.E. in Information Science — Yenepoya Institute of Technology (2021 – 2025)

CERTIFICATIONS

Data Analytics Job Simulation (Deloitte/Forage) • Infosys Springboard Cloud Computing • Microsoft Azure Cloud • Power BI
